

Welcome SCIENCE-TO-GO Kits!

The “Science Kit Program” is for Kindergarten through 5th grade students and features 50+ exciting experiments for your little scientist to explorer at home! Each kit is a self contained science experiment that teaches science concepts in a fun, hands-on way.

Each kit includes a Scientific Observation form which may be completed along with the experiment. There will be fun prizes for scientific feedback awarded in December 2010 & March and May 2011!

The kits will be distributed on Tuesdays, you will have 2 full weeks to complete and return your student’s kit. Once you’ve enrolled your student in the program, a list of kit choices will be emailed to you.

In order for your child to be able to complete the kits at home, a permission slip MUST be on file. Please fill out the form below and either email it to Monica Tracey (mtracey@wolfenet.com) or place it in the Science Kit folder in the school office. Please return this form by Friday, October 15th so your student(s) will be signed up prior to the first distribution of kits on Oct 19th.

Note: Your child may join the program at any time during the school year.

St Monica Parents Club SCIENCE-TO-GO kits Permission Slip/Release Form – 2010/11

STUDENT NAME _____ GRADE: _____

STUDENT NAME _____ GRADE: _____

PARENT’S NAME _____

PHONE (required) _____

Email (required) _____

The children listed above have my permission to check out and use the SCIENCE-TO-GO kits for the 2010/11 school year. I acknowledge all participants are currently enrolled students at St Monica School. I understand that the kits are to be used under the supervision of an adult, particularly since some of them direct students to use the Internet. As parent/guardian, I assume the risks associated with usage of these kits and the Internet and agree to hold St Monica School and its Parents Club harmless against any injuries or damages that may occur.

WE PROMISE TO RETURN THE KITS ON TIME!
